1. Applicant's amendment after final has been considered a request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 18 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Weatherly (newly cited). Weatherly discloses the claimed subject matter including a method of forming a hull with a main body 10, directly coupling a plurality of hull independent hull portions, such as 46 and 54, to the main body, each hull portion being of less length than the main body, and each hull portion having a different length.

4. Claims 8-16 and 24 are allowed.

5. Applicant's arguments with respect to claim 18 have been considered but are moot in view of the new ground(s) of rejection.
